HDS Semi-Scissor Lift

HDS Semi-Scissor Lift

Finkbeiner HDS Semi-Scissor Lift sets a new benchmark for workshops, delivering reliable and efficient lifting for all vehicles from forklifts to articulated buses and heavy trucks.

- Ideal for a range of wheelbases and wash bays
- Safe and stable lifting with full access and dual locks
- Y-TEC semi-scissor with robust Double Z design
- 25t + 35t platforms for greater flexibility and length
- Lower ownership costs with higher workshop output

SPECIFICATIONS

	HDS25	HDS35	HDS50	HDS70
Load support	Platforms			
Capacity	25t	35t	50t	70t
Number of platforms	2		4	
Platform width	750mm			
Platform height	360mm			
Platform distance	1100mm			
Platform surface	Smooth metal sheet			
Effective lifting stroke	1780mm			
Lifting height (floor)	2140mm			
Lifting height (recessed)	1780mm			
Lifting time	90 sec			
Drive mode	Electro-hydraulic			
Motor	AC Voltage			
Motor power (kW)	8.8kW		17.6kW	
Power supply	Mains supply			
Electrical	400V/3Ph+N+PE/50Hz			
Air connection	6 Bar			
Fuse (Amps)	32A		50A	
Operation mode	1 Central cord unit			
Control	Electronic			
Soft start	X			
Synchronisation	Proportional valves, infinitely variable			
Load securing	Hydraulic and mechanical			
Dust and water protection	IP65			
Floor load	C20/25			
Paint	Powdercoating			
Colour	Grey RAL7015			

HDS25 and HDS35 are available in 6.5m, 8m and 9m lengths. HDS50 is 2x25t and HDS70 is 2x35t.
