RUD Australia

Celebrating 40 Years of Excellence in 2024

Welcome to the third edition of RUDConnect.

RUD Group is the world leader in chain technology and the specialist in lifting and material handling solutions including conveyor systems. The Perth office in Australia is made up of a dynamic and passionate team of experts, offering concept to completion solutions to a diverse clientele in the mining, heavy automotive and material handling industries.

RUD has been working with clients in Western Australia for over 40 years. In 2008, RUD Australia opened a full fledged branch office in Perth to cater to the increasing demands of the mining industry. Currently the Perth office includes a large warehouse and a workshop which offers roll on and repair service of underground tyre protection chains.

- Large stock of certified lifting and lashing products for multi-directional loading including ICE Grade 120 chains.
- Technical expertise offering conveying system solutions and components for material handling, energy production and drive requirements.
- A team of field service technicians to install, repair and service tyre protection and traction chains for underground mining and quarries.
- Qualified in-house engineers who can provide concept-to-completion solutions.
- Sales and service of workshop lifting and handling products, including Endurequip Portalift, which is the only portable heavy vehicle hoist made in Australia.
- A history of successful installed projects across WA.

* RUD Perth will reopen on 8 Jan 2024

RUD TEAM MEMBER IN FOCUS

Novak Anfuso is the WA State Manager at RUD, leading a dynamic Sales & Service Team with a strategic focus on driving growth. In addition to overseeing the team's success, Novak is committed to fostering the professional development of his staff. Outside of work, he enjoys staying active through activities like surfing and basketball, maintaining a balance in his busy schedule.

Project in Focus - SIMS Metal Recycling Plant

SIMS Metal was constructing a new metal recycling plant in Perth. A high-quality conveyor system was identified as critical to the plant's operations and success.

The Scope of Work

RUD Australia successfully won a tender for the design and delivery of the SIMS Metal Recycling Plant conveyor system.

The conveyor system required a controlled feed into an inclined belt. Metering and controlled flow were also essential features required in the system.

The Solution

RUD's new conveyor system has proved to be an outstanding solution to boost productivity in the recycling plant. **It has demonstrated significant advantages over other alternatives.**

RUD Australia continues to provide ongoing support, delivering and refining the system. ***Click to read more ...***

Trade Shows in 2023

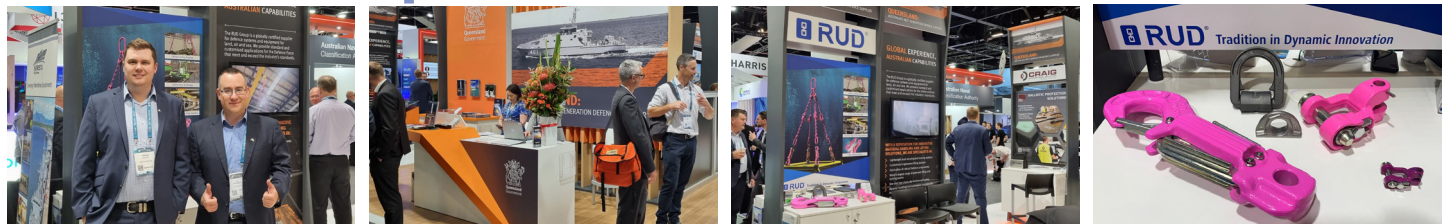

Brisbane Truck Show - May

CICA Conference - October

Indo Pacific Expo - November

Lifting & Lashing

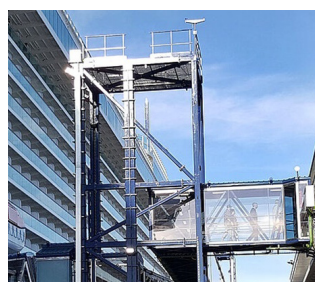

RUD CHAINS ARE BRILLIANT ACCORDING TO SURELIFT

Director of SureLift Crane Hire Mark 'Chopper' Read talks about RUD Chains in the Oct issue of Cranes & Lifting magazine. "They're the best chains in the industry, all of RUD's lifting and lashing equipment consistently perform on safety and durability measures. This is the reason why we don't buy anything but RUD."

Conveyor & Drive

DRIVE TECHNOLOGY FOR CRUISE SHIP TERMINAL

RUD's TECDOS Drive system offers an ideal solution for a gangway which needs to be robust, secure and safe under challenging conditions. TECDOS drive systems using calibrated steel chains fitting into complimenting sprockets are an ideal replacement for pinion gear and wire rope drives.
