# OVERVIEW

## The World Leader in Chain Technology

The RUD Group began as RUD Chains in 1875, founded by the Rieger family in Germany. More than 150 years later, the Rieger family are still actively involved at the helm of this global company. Excellence in quality and continuous innovation has remained the foundation of the RUD Group.

Now, the RUD Group employs more than 2500 people worldwide, and our products are found in more than 120 countries. We hold over 500 international patents, cementing our reputation as the world leader in innovation in chain technology.

### *Global Experience, Australian Capabilities*

RUD Australia celebrated 40 years in 2024 and has been led by the Nuttall family since inception. From humble beginnings in 1984 in a garage on the south side of Brisbane to a 6000m<sup>2</sup> warehouse and manufacturing facility in Larapinta QLD including an office and warehouse in Perth WA, we have come a long way as one of the most trusted companies in lifting and materials handling for the mining, defence, infrastructure and transport industries.

Our engaging and collaborative approach makes us a partner of choice for organisations that value high quality. All our niche products and solutions are rigorously tested and assessed against our strict quality-control measures. We complement these products with our in-house engineers technical support and training services. Our speed in delivering bespoke solutions sets us apart from others.

# PRODUCTS TO SOLUTIONS

## LIFTING & LASHING SOLUTIONS

Our product range includes more than 700 lifting slings and lashing points for multi-directional loading. Every product has been tested and certified to ensure it meets RUD's exceptional strength, performance, and endurance standards.

## CONVEYOR AND DRIVE SYSTEMS

RUD can provide the appropriate solution for conveying, driving, or lifting. RUD designs and produces conveyor and bucket elevator systems using round steel chains, forked link chains, screw drives or belts as traction mechanisms for a wide range of applications in horizontal, vertical, and inclined requirements.

## TYRE PROTECTION CHAINS

RUD supplies 65% of the world's Tyre Protection Chains. By adopting new technology from long-established welding, forging and heat-treating methods, RUD has developed superior tyre protection and traction chains, essential in the challenging industries of mining, quarrying, scrap handling, steel making, and demolition.

# PRODUCTS TO SOLUTIONS

## INDUSTRIAL & HOIST CHAINS

RUD is the world leader for hoist and industrial chains and sets the standard for quality and innovation. The highly wear-resistant German-made hoist chains are sought after by leading hoist manufacturers for their hardness, geometry, chain marking and calibration. RUD chains are used by many companies in the wind power, entertainment, offshore and foundry industries for their innovation and endurance.

## ENGINEERED PRODUCTS & SERVICES

RUD offers you engineered products and solutions for lifting, load securing and material handling:

- Lifting and materials handling solutions such as lifting devices, transport frames, lifting platforms and turnkey conveyor systems
- Steel industry products such as coil tilters, c-hooks, bore tongs and feeder units
- Workshop handling products such as heavy vehicle stands, work platforms and A-frames

## PRE-CAST CONCRETE HOOPS

Philipp Lifting Hoops offer simple, efficient solutions to lift large concrete products such as beams, decks, and girders. The pre-cast concrete hoops have a fully engineered design and are colour-coded for easy visual checks. They eliminate the need for specialist lifting clutches or equipment, making them compatible with standard lifting equipment.

In addition, the hoops are installed without using recess formers and are suitable for high-load capacities, ensuring safety and reliability.

# PRODUCTS TO SOLUTIONS

## HEAVY VEHICLE HOISTS

Australians have trusted RUD to provide heavy vehicle lifting solutions for trucks, buses, and rail. We are known for Endurequip Portalift which is reputed for 35 years as the only Australian-made mobile heavy vehicle hoist symbolising quality and technology for the most arduous Australian applications. We also offer a high-quality German wireless mobile heavy vehicle hoist, Finkbeiner, known worldwide since 1927 for quality and innovation.

## DEFENCE CAPABILITIES

The RUD Group is a globally certified supplier of defence systems and equipment for land, air and sea. We provide standard and specialist applications for the defence force that meet and exceed their exacting standards. As a contractor for defence for land, air, and sea vehicle equipment, we are also involved in the ongoing maintenance of defence vehicle equipment with multiple NSN (NATO Serial Number) Solutions.

## ENGINEERING & TESTING CAPABILITIES

We have the capability to test fabricated goods and lifting devices in-house, with two 200-tonne and a 500-tonne test bed. This enables our team to assess their final products, ensuring quality and structural strength that exceed industry standards.

With expanded positional robotic welding technology and laser scanning capabilities delivering greater design accuracy, we can reverse engineer solutions to suit client specifications.

## INDUSTRIES SERVED:

- Mining and Quarrying
- Infrastructure, Construction & Steel Processing
- Defence
- Oil, Gas & Energy
- Engineering
- Transport

## ACCREDITATIONS:

- AS/NZS ISO 3834 - Quality Requirements for Fusion Welding of Metallic Materials (Part 2)
- DIN 2303 Q2 BK1 - Welding of Military Products
- AS/NZS ISO 9001:2015 - Quality Management Systems
- AS/NZS ISO 14001:2015 - Environmental Management Systems
- AS/NZS 45001:2018 - Occupational Health and Safety Management Systems
- ISO-IEC 17025 - Standard Applications Document for Accreditation for Testing and Calibration Facilities

## ASSOCIATIONS:

AIDN  
(Australia Industry Defence Network)

IQA  
(Institute of Quarrying Australia)

CICA  
(Crane Industry Council of Australia)

HVA  
(Heavy Vehicle Industry Association)

BIC  
(Bus Industry Confederation)

ASI  
(Australian Steel Institute)

Australian Made  
(Endurequip Hoists only)

Weld Australia

LEAA  
(The Lifting Equipment Engineers Association)

NATA  
(National Association of Testing Authorities)

# OUR PEOPLE

Our 6000m<sup>2</sup> warehouse and manufacturing facility located in Brisbane, QLD, has a dedicated in-house team who can offer complete engineered manufacturing solutions. Our qualified team of CPeng/RPEQ/RPEV engineers and experienced tradespeople can manage every aspect of your project or service requirements to ensure you receive the highest quality RUD solutions.
